The Parlor NYC

160 Madison Avenue, NYC 10016

The Parlor NYC is pleased to present a solo exhibition of works by artist in residence **Indira Cesarine** opening on October 29, 2020 and on view through August 31, 2021. The exhibition, which is presented in collaboration with The Untitled Space gallery, will be the inauguration of their resident artist series presented annually at the newly opened 13,000 sq ft luxury wellness space located in the heart of the NoMad Design District at 33rd Street and Madison Avenue.

The Parlor NYC's artist residency uniquely fuses the luxury wellness community with contemporary art. The exhibition presents a collection of over 70 works in a variety of mediums including photography, printmaking, and mixed media neon artwork created by the artist between 1993-2020. Many early works on paper, including a number of intaglio etchings created in the 1990s are being exhibited for the first time. Known for her empowering feminist themes, Indira Cesarine's artwork engages a narrative of social discourse and art activism. Cesarine's artwork has been featured internationally at many galleries, museums, and festivals, including The Metropolitan Museum of Art, Mattatuck Museum, Hudson Valley MOCA, The Watermill Center, Paul Mellon Art Center, CICA Museum, San Luis Obispo Museum of Art, French Embassy Cultural Center, Art Basel Miami, Cannes Film Festival, and SPRING/BREAK Art Show to name a few.

The Parlor NYC's inaugural residency displays select works from Cesarine's "Goddess," "Papillones," "EDEN," "THE LABYRINTH," "ONLY YOU," as well as "Sappho" and "GIRLS" series. Juxtaposed with The Parlor NYC's interior foliage walls, her "Papillones" series features macro photographic visuals of a variety of butterfly species Cesarine photographed in Costa Rica. The imagery is manipulated to present "butterfly blots" inspired by the psychological ink blots known as the Rorschach Test. Her "EDEN" photographic series, inspired by the Garden of Eden and the story of Eve, complements

The Parlor NYC's lush garden interiors. Continuing through the space is Cesarine's "Goddess" series featuring celebrated modern dancer Katherine Crockett's nude form juxtaposed with macro florals. Throughout The Parlor NYC, the viewer can discover a number of her nude portraits and erotic florals from "THE LABYRINTH" series which emphasize her female gaze on Surrealism with a focus on female identity and desire.

Additional photographic works on view include a selection of archival prints on aluminum from her "ONLY YOU" series, which focus on the eyes as an emotional portal. A number of intaglio etchings from her "Sappho" series created in the early 90s premiere in the residency. Intaglio printmaking has been an important part of Cesarine's artistic practice since she first started creating. Her etchings are inspired by women's history often taking as inspiration figures from mythology, philosophy, media, and literature. The "Sappho" series is inspired by Greek poet Sappho, who lived between 630BCE and 570 BCE on the Greek Isle of Lesbos. Considered to be one of the greatest of the early Greek poets, her verses elaborated on erotic themes of love and passion. A selection of more recent etchings from Cesarine's "GIRLS" series are also featured in the exhibition. The vibrant hued prints celebrate the female form, re-appropriating silhouettes from vintage pin-up images and re-positioning them in natural environments as an act of female empowerment and sex-positive femininity. The overview of works spanning several decades on view at The Parlor NYC is brought together through the venue's earthy contemporary interior.

"2020 has been a year of reflection for me. Like many others, during the quarantine, I have had a lot of time to think about my past, my future, as well as my work as an artist.

When I was approached by The Parlor NYC to present my work throughout their 13,000 square foot space, initially it was a rather overwhelming concept. It also inspired me to review my entire body of work and consider including many early works that I had never exhibited before. It has been a motivating process to dig through my archives and not only see how my style has evolved over the years, but also see it come to life in The Parlor NYC's contemporary urban oasis. Explorations of female identity, sexuality, dreams, and desires have been returning themes in my artwork since I first started creating. Through this residency I was able to present several series of works that resonate with these themes, and I'm thankful for this opportunity to not only have my work on view for the next year at The Parlor NYC but also for the insight and inspiration it has given me in the continuation of my art practice. I want to thank Magnus Resch for the introduction to Pam Wolf, founder of The Parlor NYC. I'm looking forward to continuing the collaboration with the venue not only as an artist but also as a curator for future residencies at the space. Now more than ever is a time to think outside the box, with artists, creatives, and businesses alike supporting each other and continuing to make New York City thrive with creative opportunities." – *Indira Cesarine*
